

Year R: Our Learning

Friday 23rd January 2026

Messages for Parents/Carers

This week in our maths sessions we have been learning to order numbers to 10. On the reverse of this sheet are some number cards that you can cut up, order and count out the correct number of cubes or counters to place on each number. Here are some other games you can try at home.

What number comes after ___? What number comes before ___?

What number comes in between ___ and ___?

This week we are thinking all about **Bears**

In your family can you complete some of these home learning challenges?

You can upload photos onto Tapestry. Please title your post My home learning.

We can't wait to see how much fun you have learning about **bears** at home!

Curious Crab

This week we shared the book *We're going on a bear hunt* about a bear that lives in a cave.

Can you think of a different place that the bear could go on holiday and draw a picture of it? Is it a hot place or cold place? What does the bear do when they get there? How do they get there?

Trying Turtle

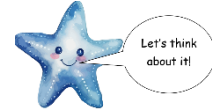

Can you make a bear from an old tube?

You could make a brown bear, a panda bear or even a polar bear.

Can you imagine and tell a story for your bear?

Where does your bear live?

Solving starfish

Can you play the number game with teddy?

Scan the QR code to practise ordering numbers to 10.

Our **phonics** sounds that we have learnt to read and write in school this week are **h** and **b**

Our **tricky words** that we have been revising this week is **I**

Our **maths** learning this week has been about **counting and ordering numbers to 10**
